

# Trace mineral benefits for horses

**Fe IRON**

- Promotes growth
- Immune support

**I IODINE**

- Supports growth, development, reproduction and muscle function
- Immune support
- Foal vitality

**Cu COPPER**

- Skeletal development and health
- Coat color
- Reproductive development and health
- Immune support

**Co COBALT**

- Feed intake and growth
- Optimized body condition and immunity
- Coat health

**Se SELENIUM**

- Fertility and embryonic development
- Muscular development in foals
- Optimized muscle function

**Mn MANGANESE**

- Supports reproductive and immune function
- Role in bone development

**Zn ZINC**

- Maintains hoof and coat condition
- Role in wound healing and immunity
- Essential for skin and bones
- Supports fertility

## **Alltech®** MINERAL MANAGEMENT

The Alltech® Mineral Management program has proven that modern management of mineral nutrition can be carried out by the inclusion of trace minerals in the form of BIOPLEX® and SEL-PLEX® at significantly lower levels than inorganics, while still improving performance. We call this innovation Total Replacement Technology (TRT).
